TECHNICAL SKILLS

C++, JavaScript, React, Next JS, Express JS, Nest JS, Socket.IO, Firebase, Redux, MongoDB, MySQL, Tailwind CSS, Bootstrap 5, HTML, CSS, Figma, VS Code, Postman

PROJECTS

Thread Frenzy

A Full Stack E-Commerce Website

May 2024 – June 2024

Live

Client

Server

- Implemented a secure login system with Gmail, GitHub, and email passwords to protect user accounts.
- Built a payment system using Stripe for credit card payments, ensuring card details are verified before processing transactions.
- Developed filters and pagination to help users easily find items and navigate through pages.
- Designed a user dashboard for managing wish lists and viewing order history.
- Designed an admin dashboard for overseeing sales overview, check messages, and manage products, orders, and users.

Technologies: React JS, Node JS, Express JS, MongoDB, Firebase, Tailwind CSS

Talent Hive

Full Stack Professional Networking Platform

October 2024 – November 2024

Live

Client

Server

- Talent Hive's newsfeed allows users to post updates, like, comment, share, and bookmark content, with posts organized in a dynamic three-column layout. Interactive modal displays post details with a slideshow feature for images, creating an engaging browsing experience similar to LinkedIn.
- Users can explore and apply to job listings tailored to their profile and experience. Company-registered users can post jobs, and users can apply by submitting resumes directly, making Talent Hive an all-in-one platform for professional networking and job opportunities.
- Leveraging Socket.IO, Talent Hive offers a real-time messaging interface with user search functionality, unread message indicators, and seamless two-panel navigation, enabling instant communication comparable to popular messaging platforms.
- Implemented email-based account activation, JWT access and refresh tokens with MongoDB caching for seamless and secure login sessions. Users can reset passwords via email verification and maintain session continuity without interruptions.
- Users can manage connections, view personalized recommendations, and receive activity-based notifications. The detailed profile route allows users to update personal details, add social links, upload resumes, and access bookmarked content easily.

Technologies: Next JS, Nest JS, Redux, MongoDB, Socket.IO, EdgeStore, Tailwind CSS

EDUCATION

East West University

B.Sc. in Computer Science

Dhaka, Bangladesh

2020 – 2025

CERTIFICATION

Programming Hero Web Development With Jhankar Mahub

Batch-9

January 2024 - August 2024

Certificate
